

How to Utilize the MFU 2023 Legislative Scorecards:

In these scorecards, you will find analysis and information about rural and agricultural issues that were debated and presented in the 2023 Legislature.

You will find information about the issue/bill, a breakdown of what happened to it in the 2023 Legislature, and on the reverse/next pages, how your legislator voted. There is contact information listed so you can reach out to legislators to ask them about their vote on these critically important rural issues. MFU positions and analysis are denoted in each page.

The votes on each issue are on the back/second pages and are divided in 4 different regions, grouping them by the regions listed below.

- Northwest MT
- Central MT
- Southwest/Southcentral MT
- Hi-Line/Eastern MT

Please read the scorecard that corresponds with the region you reside in to locate your legislators' votes on the issue. The scorecard topics are listed below in the order they appear in the PDF.

1. Data Harvest (MFU Led priority - Supported)
2. Food Security (MFU Supported)
3. Creating New Water Courts (MFU Opposed)
4. Supporting Telehealth (MFU Supported)
5. Food Safety Deregulation (MFU Opposed)
6. Right to Work for Less (MFU Opposed)
7. Farm to Food Bank (MFU Supported)
8. Nursing Home Funding (MFU tracked/supported this bill at different stages)
9. Agricultural Right to Repair (MFU Led priority - Supported)
10. Country of Origin Labeling (MFU Led priority - Supported)
11. Community Solar (MFU Supported)
12. Agritourism. (MFU Supported)
13. Biofuels tax credits (MFU Supported)
14. Shelf Space for Montana Food (MFU Led priority - Supported)
15. Charter Schools (MFU Opposed)
16. Medicaid Provider Rates (MFU Supported)
17. Skilled Trades & Microbusiness (MFU Supported)

If there is a rural or agricultural issue that you have questions about from the 2023 Legislature, but is not included in this scorecard set, but you want to learn more, please reach out to office@montanafarmersunion.com

Data Harvest

HJ 27 and HB 966

Rotunda Roundup

PRESENTED BY MONTANA FARMERS UNION

What you can do:

Reach out to your legislator, or any of the legislators on the back of this card. These are the legislators from one region on the map.

Tell the legislator your name, where you live, and why agriculture is important to you.

If their votes are green, say THANK YOU!
Tell them why you support their vote.

If their votes are red, tell them why this issue is important to you. Ask them to keep the needs of farmers, ranchers and rural communities in mind for future votes. Offer to help them understand what is important to you.

Representative Katie Sullivan (D- Missoula) brought HB 966 to the House Ag committee, where it had a great hearing. HB 966 was voted down by that committee with Rep Josh Kassmier (R- Ft. Benton) casting the tie-breaking No vote. Notably, Reps Anderson , Bergstrom and Green voted yes. Committee members were excited to have the issue studied in greater detail during the interim, so that next session we would all know more about how Ag data harvest affects Montanans.

Rep Sullivan drafted and carried HJ 27, to study the issue, but the legislature adjourned before it got through the entire process. There is still opportunity to lobby interim committee members to study the issue even without the bill being passed.

We at MFU feel that the data should be released to the public as it is harvested so no one has special access to the data. This will prevent commodity traders and corporations from using the data to take advantage of producers. Understanding this new system of commercializing our data is important for Montana. We should have a plan in place to ensure that our interests, and fair commodity prices are protected.

HJ 27 -Agricultural data collection study - Rep Katie Sullivan
HB 966 Agricultural data collection - Rep Katie Sullivan

KEY TO READING THIS TABLE:

Bills have votes in committees, and on the House and Senate Floors.

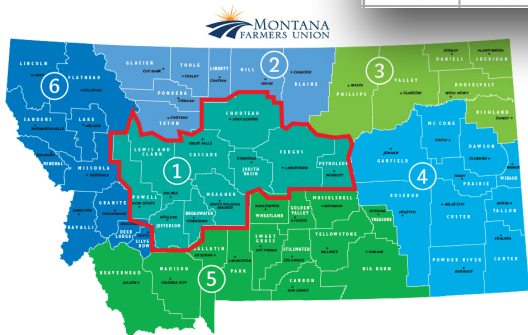

Green means the legislator's vote agreed with MFU's position.

Red means the legislator's vote did not agree with MFU's position.

The darker the color, the more times they voted for or against our position.

Sometimes a bill can change during its journey through the legislature, and that may be why the legislator changed their vote. Ask them!

Data Harvest

HJ 27 and HB 966

Rotunda Roundup

PRESENTED BY MONTANA FARMERS UNION

What you can do:

Reach out to your legislator, or any of the legislators on the back of this card. These are the legislators from one region on the map.

Tell the legislator your name, where you live, and why agriculture is important to you.

If their votes are green, say THANK YOU! Tell them why you support their vote.

If their votes are red, tell them why this issue is important to you. Ask them to keep the needs of farmers, ranchers and rural communities in mind for future votes. Offer to help them understand what is important to you.

Representative Katie Sullivan (D- Missoula) brought HB 966 to the House Ag committee, where it had a great hearing. HB 966 was voted down by that committee with Rep Josh Kassmier (R- Ft. Benton) casting the tie-breaking No vote. Notably, Reps Anderson , Bergstrom and Green voted yes. Committee members were excited to have the issue studied in greater detail during the interim, so that next session we would all know more about how Ag data harvest affects Montanans.

Rep Sullivan drafted and carried HJ 27, to study the issue, but the legislature adjourned before it got through the entire process. There is still opportunity to lobby interim committee members to study the issue even without the bill being passed.

We at MFU feel that the data should be released to the public as it is harvested so no one has special access to the data. This will prevent commodity traders and corporations from using the data to take advantage of producers. Understanding this new system of commercializing our data is important for Montana. We should have a plan in place to ensure that our interests, and fair commodity prices are protected.

HJ 27 -Agricultural data collection study - Rep Katie Sullivan
HB 966 Agricultural data collection - Rep Katie Sullivan

KEY TO READING THIS TABLE:

Bills have votes in committees, and on the House and Senate Floors.

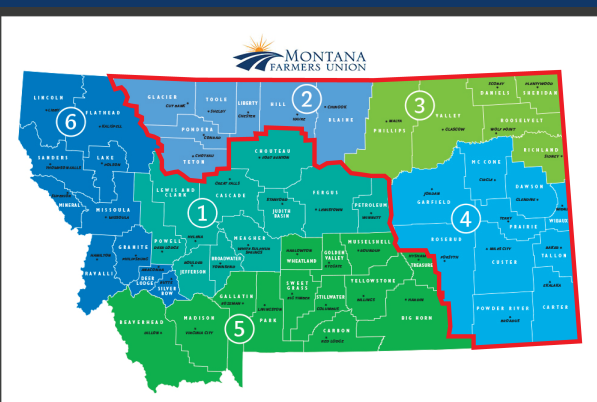

Green means the legislator's vote agreed with MFU's position.

Red means the legislator's vote did not agree with MFU's position.

The darker the color, the more times they voted for or against our position.

Sometimes a bill can change during its journey through the legislature, and that may be why the legislator changed their vote. Ask them!

What you can do:

Reach out to your legislator, or any of the legislators on the back of this card. These are the legislators from one region on the map.

Tell the legislator your name, where you live, and why agriculture is important to you.

If their votes are green, say THANK YOU! Tell them why you support their vote.

If their votes are red, tell them why this issue is important to you. Ask them to keep the needs of farmers, ranchers and rural communities in mind for future votes. Offer to help them understand what is important to you.

Promoting resilient regional food systems and diverse markets is a key reason that Montana Farmers Union exists. Our organization took root as homesteaders arrived and farmers and ranchers discovered the necessity of getting together in one common cause. We believed that the desire for a profitable market for the products of the farm or ranch could best be accomplished by real cooperation.

HB 463 provides an opportunity for the state and agricultural producers to cooperate in both developing markets for our goods, and providing fresh, nutritious food to schools and other institutions that the state procures food for.

HB 463 is an investment - seed money, if you will - into local economies. Even if the original fiscal note, which was not calculated according to the amended version of this bill were correct, it would be a sound investment. We're gratified to know about the lower cost, which will make HB 463 and even more sound investment.

In order to make this collaboration work, we need to know how much local food is being procured by the state. While we'd love to start providing more local foods for the state today, we are also excited to learn from the reporting called for in HB 463 about how we can be more effective collaborators with the state.

SJ 27- Study of food security and agricultural prosperity - Senator Andrea Olsen
HB 463 - Establish reporting requirement for food procurement - Rep Katie Sullivan

KEY TO READING THIS TABLE:

Bills have votes in committees, and on the House and Senate Floors.

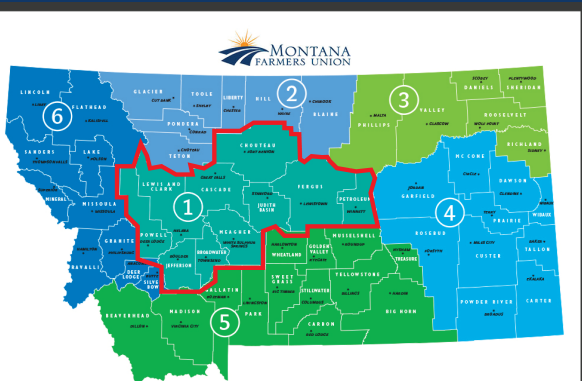

Green means the legislator's vote agreed with MFU's position.

Red means the legislator's vote did not agree with MFU's position.

The darker the color, the more times they voted for or against our position.

Sometimes a bill can change during its journey through the legislature, and that may be why the legislator changed their vote. Ask them!

Food Security

SJ 27 and HB 463

Rotunda Roundup

PRESENTED BY MONTANA FARMERS UNION

What you can do:

Reach out to your legislator, or any of the legislators on the back of this card. These are the legislators from one region on the map.

Tell the legislator your name, where you live, and why agriculture is important to you.

If their votes are green, say THANK YOU! Tell them why you support their vote.

If their votes are red, tell them why this issue is important to you. Ask them to keep the needs of farmers, ranchers and rural communities in mind for future votes. Offer to help them understand what is important to you.

Promoting resilient regional food systems and diverse markets is a key reason that Montana Farmers Union exists. Our organization took root as homesteaders arrived and farmers and ranchers discovered the necessity of getting together in one common cause. We believed that the desire for a profitable market for the products of the farm or ranch could best be accomplished by real cooperation.

HB 463 provides an opportunity for the state and agricultural producers to cooperate in both developing markets for our goods, and providing fresh, nutritious food to schools and other institutions that the state procures food for.

HB 463 is an investment - seed money, if you will - into local economies. Even if the original fiscal note, which was not calculated according to the amended version of this bill were correct, it would be a sound investment. We're gratified to know about the lower cost, which will make HB 463 and even more sound investment.

In order to make this collaboration work, we need to know how much local food is being procured by the state. While we'd love to start providing more local foods for the state today, we are also excited to learn from the reporting called for in HB 463 about how we can be more effective collaborators with the state.

SJ 27- Study of food security and agricultural prosperity - Senator Andrea Olsen

HB 463 - Establish reporting requirement for food procurement - Rep Katie Sullivan

Food Security

SJ 27 and HB 463

Rotunda Roundup

PRESENTED BY MONTANA FARMERS UNION

What you can do:

Reach out to your legislator, or any of the legislators on the back of this card. These are the legislators from one region on the map.

Tell the legislator your name, where you live, and why agriculture is important to you.

If their votes are green, say **THANK YOU!** Tell them why you support their vote.

If their votes are red, tell them why this issue is important to you. Ask them to keep the needs of farmers, ranchers and rural communities in mind for future votes. Offer to help them understand what is important to you.

Promoting resilient regional food systems and diverse markets is a key reason that Montana Farmers Union exists. Our organization took root as homesteaders arrived and farmers and ranchers discovered the necessity of getting together in one common cause. We believed that the desire for a profitable market for the products of the farm or ranch could best be accomplished by real cooperation.

HB 463 provides an opportunity for the state and agricultural producers to cooperate in both developing markets for our goods, and providing fresh, nutritious food to schools and other institutions that the state procures food for.

HB 463 is an investment - seed money, if you will - into local economies. Even if the original fiscal note, which was not calculated according to the amended version of this bill were correct, it would be a sound investment. We're gratified to know about the lower cost, which will make HB 463 and even more sound investment.

In order to make this collaboration work, we need to know how much local food is being procured by the state. While we'd love to start providing more local foods for the state today, we are also excited to learn from the reporting called for in HB 463 about how we can be more effective collaborators with the state.

SJ 27- Study of food security and agricultural prosperity - Senator Andrea Olsen

HB 463 - Establish reporting requirement for food procurement - Rep Katie Sullivan

KEY TO READING THIS TABLE:

Creating New Water Courts- SB 72

Rotunda Roundup

PRESENTED BY MONTANA FARMERS UNION

What you can do:

Reach out to your legislator, or any of the legislators on the back of this card. These are the legislators from one region on the map.

Tell the legislator your name, where you live, and why agriculture is important to you.

If their votes are green, say THANK YOU! Tell them why you support their vote.

If their votes are red, tell them why this issue is important to you. Ask them to keep the needs of farmers, ranchers and rural communities in mind for future votes. Offer to help them understand what is important to you.

This bill would move the appointment of water court judges from the nonpartisan Supreme Court into the Governor's office. Following ratification of the state Constitution in 1972 that recognized existing water rights, the Legislature passed the Montana Water Use Act of 1973. That tasked district courts with issuing final decrees on nearly 220,000 pre-1973 water rights to determine the entirety of priorities in each of Montana's basins.

By 1979 lawmakers realized the enormity of the workload on district courts and created the Water Court. The Water Court has slowly adjudicated rights in an effort to reach final basin decrees for the state by 2028, at which time the court is currently scheduled to expire and dissolve.

We opposed this bill because it politicizes water court judges and injects a great deal of uncertainty into our water courts and water rights disputes moving forward. It would create a new unnecessary bureaucracy. When the adjudication process is completed any water disputes can be handled locally by the district court and can be appealed to the supreme court which is how disputes are handled now. There are few disputes being handled by the court system. It makes no sense to create a whole new bureaucracy to handle a few water disputes each year.

Carried by Sen Steve Fitzpatrick (R. Great Falls), SB 72 passed easily through Senate Natural Resources committee, and passed easily through the Senate. It was then referred to the House Judiciary committee, which tabled it on a bipartisan vote

SB 72-Revise judicial administration of water rights- Sen Steve Fitzpatrick

Creating New Water Courts- SB 72

Rotunda Roundup

PRESENTED BY MONTANA FARMERS UNION

What you can do:

Reach out to your legislator, or any of the legislators on the back of this card. These are the legislators from one region on the map.

Tell the legislator your name, where you live, and why agriculture is important to you.

If their votes are green, say THANK YOU! Tell them why you support their vote.

If their votes are red, tell them why this issue is important to you. Ask them to keep the needs of farmers, ranchers and rural communities in mind for future votes. Offer to help them understand what is important to you.

This bill would move the appointment of water court judges from the nonpartisan Supreme Court into the Governor's office. Following ratification of the state Constitution in 1972 that recognized existing water rights, the Legislature passed the Montana Water Use Act of 1973. That tasked district courts with issuing final decrees on nearly 220,000 pre-1973 water rights to determine the entirety of priorities in each of Montana's basins.

By 1979 lawmakers realized the enormity of the workload on district courts and created the Water Court. The Water Court has slowly adjudicated rights in an effort to reach final basin decrees for the state by 2028, at which time the court is currently scheduled to expire and dissolve.

We opposed this bill because it politicizes water court judges and injects a great deal of uncertainty into our water courts and water rights disputes moving forward. It would create a new unnecessary bureaucracy. When the adjudication process is completed any water disputes can be handled locally by the district court and can be appealed to the supreme court which is how disputes are handled now. There are few disputes being handled by the court system. It makes no sense to create a whole new bureaucracy to handle a few water disputes each year.

Carried by Sen Steve Fitzpatrick (R. Great Falls), SB 72 passed easily through Senate Natural Resources committee, and passed easily through the Senate. It was then referred to the House Judiciary committee, which tabled it on a bipartisan vote

SB 72-Revise judicial administration of water rights- Sen Steve Fitzpatrick

KEY TO READING THIS TABLE:

Bills have votes in committees, and on the House and Senate Floors.

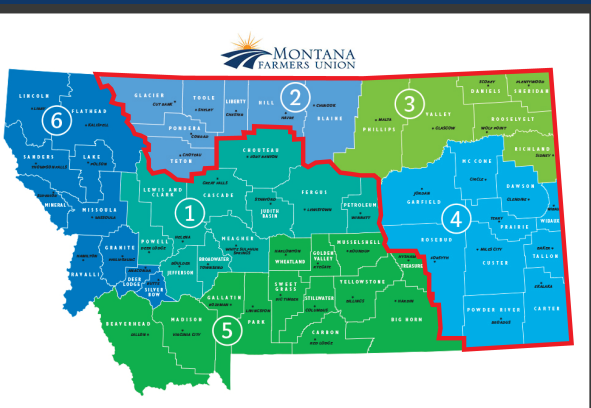

Green means the legislator's vote agreed with MFU's position.

Red means the legislator's vote did not agree with MFU's position.

The darker the color, the more times they voted for or against our position.

Sometimes a bill can change during its journey through the legislature, and that may be why the legislator changed their vote. Ask them!

Creating New Water Courts- SB 72

Rotunda Roundup

PRESENTED BY MONTANA FARMERS UNION

What you can do:

Reach out to your legislator, or any of the legislators on the back of this card. These are the legislators from one region on the map.

Tell the legislator your name, where you live, and why agriculture is important to you.

If their votes are green, say THANK YOU! Tell them why you support their vote.

If their votes are red, tell them why this issue is important to you. Ask them to keep the needs of farmers, ranchers and rural communities in mind for future votes. Offer to help them understand what is important to you.

This bill would move the appointment of water court judges from the nonpartisan Supreme Court into the Governor's office. Following ratification of the state Constitution in 1972 that recognized existing water rights, the Legislature passed the Montana Water Use Act of 1973. That tasked district courts with issuing final decrees on nearly 220,000 pre-1973 water rights to determine the entirety of priorities in each of Montana's basins.

By 1979 lawmakers realized the enormity of the workload on district courts and created the Water Court. The Water Court has slowly adjudicated rights in an effort to reach final basin decrees for the state by 2028, at which time the court is currently scheduled to expire and dissolve.

We opposed this bill because it politicizes water court judges and injects a great deal of uncertainty into our water courts and water rights disputes moving forward. It would create a new unnecessary bureaucracy. When the adjudication process is completed any water disputes can be handled locally by the district court and can be appealed to the supreme court which is how disputes are handled now. There are few disputes being handled by the court system. It makes no sense to create a whole new bureaucracy to handle a few water disputes each year.

Carried by Sen Steve Fitzpatrick (R. Great Falls), SB 72 passed easily through Senate Natural Resources committee, and passed easily through the Senate. It was then referred to the House Judiciary committee, which tabled it on a bipartisan vote

SB 72-Revise judicial administration of water rights- Sen Steve Fitzpatrick

Supporting Telehealth SB 196

Rotunda Roundup

PRESENTED BY MONTANA FARMERS UNION

What you can do:

Reach out to your legislator, or any of the legislators on the back of this card. These are the legislators from one region on the map.

Tell the legislator your name, where you live, and why agriculture is important to you.

If their votes are green, say THANK YOU! Tell them why you support their vote.

If their votes are red, tell them why this issue is important to you. Ask them to keep the needs of farmers, ranchers and rural communities in mind for future votes. Offer to help them understand what is important to you.

During the COVID-19 pandemic, Medicaid and private insurers loosened payment restrictions for telehealth services, and in 2021, Montana enacted a law making it mandatory for insurers to offer telehealth coverage. But with no policy to govern reimbursement rates, providers were often underpaid. SB 196 would make it mandatory for insurers to reimburse telehealth and in-person services at an equal rate. The bill was tabled in Senate Public Health Committee on a party-line vote, with all Republicans voting against it and all Democrats voting for it.

Increasing telehealth access is important to Montana's family farmers, ranchers and rural communities. Telehealth has provided a breakthrough in access to mental health services which is particularly important today. This bill would have incentivized providers to practice in rural areas.

Recent studies have estimated that up to 20% of Montana farmers and ranchers are experiencing mental health challenges. Mental health delivery to our rural population has been made a priority by the MT Dep of Ag. SB 196 will level the playing field for providers offering online services, and make more mental health services available to regular Montanans.

SB 196- Require payment parity in insurance of telehealth- Sen Walt Sales

KEY TO READING THIS TABLE:

Bills have votes in committees, and on the House and Senate Floors.

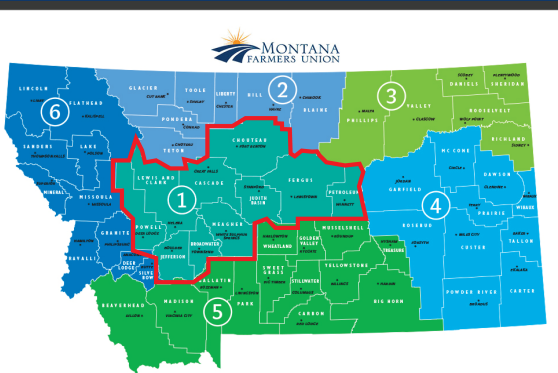

Green means the legislator's vote agreed with MFU's position.

If their votes are red, tell them why this issue is important to you. Ask them to keep the needs of farmers, ranchers and rural communities in mind for future votes. Offer to help them understand what is important to you.

During the COVID-19 pandemic, Medicaid and private insurers loosened payment restrictions for telehealth services, and in 2021, Montana enacted a law making it mandatory for insurers to offer telehealth coverage. But with no policy to govern reimbursement rates, providers were often underpaid. SB 196 would make it mandatory for insurers to reimburse telehealth and in-person services at an equal rate. The bill was tabled in Senate Public Health Committee on a party-line vote, with all Republicans voting against it and all Democrats voting for it.

Increasing telehealth access is important to Montana's family farmers, ranchers and rural communities. Telehealth has provided a breakthrough in access to mental health services which is particularly important today. This bill would have incentivized providers to practice in rural areas.

Recent studies have estimated that up to 20% of Montana farmers and ranchers are experiencing mental health challenges. Mental health delivery to our rural population has been made a priority by the MT Dep of Ag. SB 196 will level the playing field for providers offering online services, and make more mental health services available to regular Montanans.

SB 196- Require payment parity in insurance of telehealth- Sen Walt Sales

KEY TO READING THIS TABLE:

Bills have votes in committees, and on the House and Senate Floors.

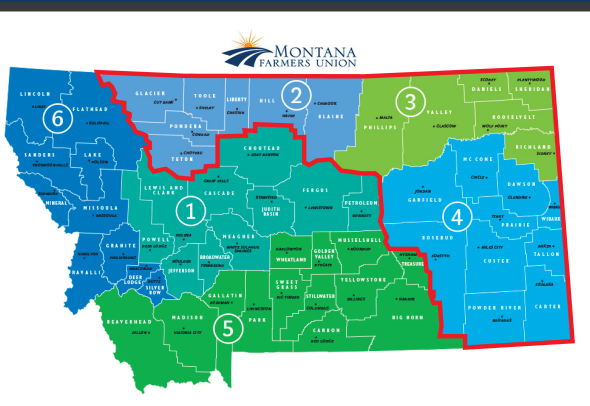

Green means the legislator's vote agreed with MFU's position.

Red means the legislator's vote did not agree with MFU's position.

The darker the color, the more times they voted for or against our position.

Sometimes a bill can change during its journey through the legislature, and that may be why the legislator changed their vote. Ask them!

Food Deregulation SB 202

Rotunda Roundup

PRESENTED BY MONTANA FARMERS UNION

What you can do:

Reach out to your legislator, or any of the legislators on the back of this card. These are the legislators from one region on the map.

Tell the legislator your name, where you live, and why agriculture is important to you.

If their votes are green, say **THANK YOU!** Tell them why you support their vote.

If their votes are red, tell them why this issue is important to you. Ask them to keep the needs of farmers, ranchers and rural communities in mind for future votes. Offer to help them understand what is important to you.

MFU stood in reluctant opposition to SB 202. While our members want their farm products to be sold in local markets and to support community food systems, we also have policy in support of food safety and local control. This law will prohibit local markets from regulating the safety of the products their vendors sell.

The Cottage Food law went into effect in 2015 and was a boon to small producers. It allowed all forms of in-person sales within the state. SB 199, the MT Local Food Choice Act was passed in 2021 and it removed almost all restrictions from selling homemade food, and it prevents government agencies from regulating a producer. There was a lot of confusion around its implementation. That confusion has not been a benefit to the cottage food industry.

SB 202 muddies the waters further, by not allowing farmers markets to adopt food safety rules. We think local markets should have the freedom to stay with rules that have been working for them, and we support the Department of Agriculture and the DPHHS in their efforts to monitor standardized state programs for food safety at farmers markets and within the cottage food industry.

The bill passed through Senate Public Health, Welfare and Safety committee, the House Agriculture and and the Senate floor with all Republicans voting for it and all Democrats voting against it. On the House floor, four democrats voted for the bill. It was enacted into law.

SB 202- Generally revise the Montana Local Food Choice Act - Sen. Greg Hertz

KEY TO READING THIS TABLE:

Bills have votes in committees, and on the House and Senate Floors.

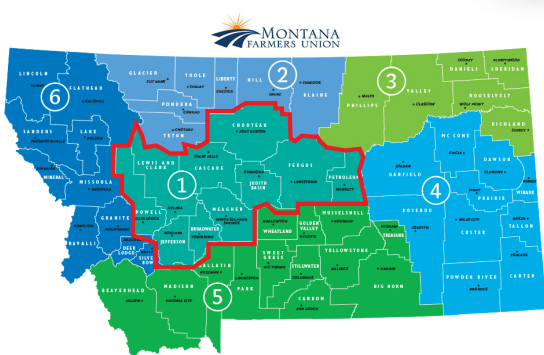

Green means the legislator's vote agreed with MFU's position.

Red means the legislator's vote did not agree with MFU's position.

The darker the color, the more times they voted for or against our position.

Sometimes a bill can change during its journey through the legislature, and that may be why the legislator changed their vote. Ask them!

Food Deregulation SB 202

Rotunda Roundup

PRESENTED BY MONTANA FARMERS UNION

What you can do:

Reach out to your legislator, or any of the legislators on the back of this card. These are the legislators from one region on the map.

Tell the legislator your name, where you live, and why agriculture is important to you.

If their votes are green, say **THANK YOU!** Tell them why you support their vote.

If their votes are red, tell them why this issue is important to you. Ask them to keep the needs of farmers, ranchers and rural communities in mind for future votes. Offer to help them understand what is important to you.

MFU stood in reluctant opposition to SB 202. While our members want their farm products to be sold in local markets and to support community food systems, we also have policy in support of food safety and local control. This law will prohibit local markets from regulating the safety of the products their vendors sell.

The Cottage Food law went into effect in 2015 and was a boon to small producers. It allowed all forms of in-person sales within the state. SB 199, the MT Local Food Choice Act was passed in 2021 and it removed almost all restrictions from selling homemade food, and it prevents government agencies from regulating a producer. There was a lot of confusion around its implementation. That confusion has not been a benefit to the cottage food industry.

SB 202 muddies the waters further, by not allowing farmers markets to adopt food safety rules. We think local markets should have the freedom to stay with rules that have been working for them, and we support the Department of Agriculture and the DPHHS in their efforts to monitor standardized state programs for food safety at farmers markets and within the cottage food industry.

The bill passed through Senate Public Health, Welfare and Safety committee, the House Agriculture and and the Senate floor with all Republicans voting for it and all Democrats voting against it. On the House floor, four democrats voted for the bill. It was enacted into law.

SB 202- Generally revise the Montana Local Food Choice Act - Sen. Greg Hertz

KEY TO READING THIS TABLE:

Bills have votes in committees, and on the House and Senate Floors.

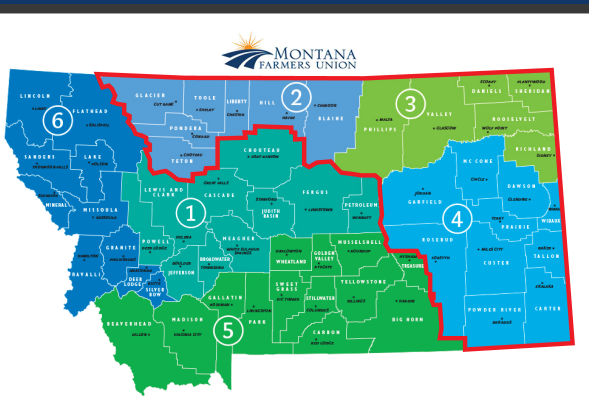

Green means the legislator's vote agreed with MFU's position.

Red means the legislator's vote did not agree with MFU's position.

The darker the color, the more times they voted for or against our position.

Sometimes a bill can change during its journey through the legislature, and that may be why the legislator changed their vote. Ask them!

Right to Work for less HB 216 and HB 448

What you can do:

Reach out to your legislator, or any of the legislators on the back of this card. These are the legislators from one region on the map.

Tell the legislator your name, where you live, and why agriculture is important to you.

If their votes are green, say THANK YOU! Tell them why you support their vote.

If their votes are red, tell them why this issue is important to you. Ask them to keep the needs of farmers, ranchers and rural communities in mind for future votes. Offer to help them understand what is important to you.

Our members spend long hours each year discerning legislative policy positions that will benefit family farmers, ranchers and rural communities. The preamble of our policy statement begins: "The needs and aspirations of farmers are those of humanity at large. MFU advocates a program that is beneficial for farmers, laborers and consumers alike." Our members go on to say that we oppose "right-to-work" legislation.

HB 448, sponsored by Rep James Bergstrom (R, Buffalo) would prohibit private sector union contracts that require employees to join a union. The bill's language originated with well-funded conservative advocacy groups like ALEC, and first appeared in Montana in HB 251. This bill was tabled in House Business and Labor by a 12-7 vote. Rep Ed Buttrey (R- Great Falls) was the only Republican on the committee to vote with the Democrats to table the bill.

HB 216, sponsored by Rep Bill Mercer (R, Billings), was also tabled in its first committee, House State Administration, by a vote of 17-1. This bill would have required government employers to have their workers sign a form with language informing them of their "right not to associate" with a union. That requirement would be unconstitutional, by allowing government interference in private contracts. As it is, public employees are not required to join a union.

HB 448 and HB 216 both deny workers the right to self-organization by imposing a slew of burdensome regulations. These would make it hard or nearly impossible for employees to exercise their right to join together to demand reasonable wages and working conditions. That right is essential for rural families and communities to earn a living. Indeed, it is essential for humanity at large.

HB 216- public employees and labor unions - Rep Bill Mercer

HB 448- Revise Laws related to right to work - Rep James Bergstrom

KEY TO READING THIS TABLE:

Bills have votes in committees, and on the House and Senate Floors.

HB 448 and HB 216 both deny workers the right to self-organization by imposing a slew of burdensome regulations. These would make it hard or nearly impossible for employees to exercise their right to join together to demand reasonable wages and working conditions. That right is essential for rural families and communities to earn a living. Indeed, it is essential for humanity at large.

HB 216- public employees and labor unions - Rep Bill Mercer

HB 448- Revise Laws related to right to work - Rep James Bergstrom

KEY TO READING THIS TABLE:

Bills have votes in committees, and on the House and Senate Floors.

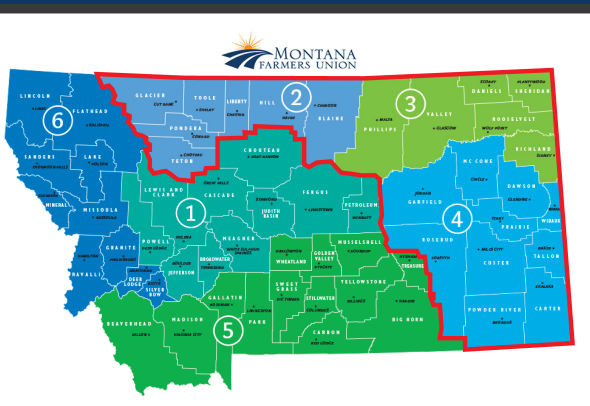

Green means the legislator's vote agreed with MFU's position.

Red means the legislator's vote did not agree with MFU's position.

The darker the color, the more times they voted for or against our position.

Sometimes a bill can change during its journey through the legislature, and that may be why the legislator changed their vote. Ask them!

Votes on HB 216 and HB 448- Right to Work for less

Right to Work for less HB 216 and HB 448

What you can do:

Reach out to your legislator, or any of the legislators on the back of this card. These are the legislators from one region on the map.

Tell the legislator your name, where you live, and why agriculture is important to you.

If their votes are green, say THANK YOU! Tell them why you support their vote.

If their votes are red, tell them why this issue is important to you. Ask them to keep the needs of farmers, ranchers and rural communities in mind for future votes. Offer to help them understand what is important to you.

Our members spend long hours each year discerning legislative policy positions that will benefit family farmers, ranchers and rural communities. The preamble of our policy statement begins: "The needs and aspirations of farmers are those of humanity at large. MFU advocates a program that is beneficial for farmers, laborers and consumers alike." Our members go on to say that we oppose "right-to-work" legislation.

HB 448, sponsored by Rep James Bergstrom (R, Buffalo) would prohibit private sector union contracts that require employees to join a union. The bill's language originated with well-funded conservative advocacy groups like ALEC, and first appeared in Montana in HB 251. This bill was tabled in House Business and Labor by a 12-7 vote. Rep Ed Buttrey (R- Great Falls) was the only Republican on the committee to vote with the Democrats to table the bill.

HB 216, sponsored by Rep Bill Mercer (R, Billings), was also tabled in its first committee, House State Administration, by a vote of 17-1. This bill would have required government employers to have their workers sign a form with language informing them of their "right not to associate" with a union. That requirement would be unconstitutional, by allowing government interference in private contracts. As it is, public employees are not required to join a union.

HB 448 and HB 216 both deny workers the right to self-organization by imposing a slew of burdensome regulations. These would make it hard or nearly impossible for employees to exercise their right to join together to demand reasonable wages and working conditions. That right is essential for rural families and communities to earn a living. Indeed, it is essential for humanity at large.

HB 216- public employees and labor unions - Rep Bill Mercer

HB 448- Revise Laws related to right to work - Rep James Bergstrom

KEY TO READING THIS TABLE:

Bills have votes in committees, and on the House and Senate Floors.

Votes on HB 216 and HB 448- Right to Work for less

Farm to Food Bank HB 276

Rotunda Roundup

PRESENTED BY MONTANA FARMERS UNION

What you can do:

Reach out to your legislator, or any of the legislators on the back of this card. These are the legislators from one region on the map.

Tell the legislator your name, where you live, and why agriculture is important to you.

If their votes are green, say THANK YOU! Tell them why you support their vote.

If their votes are red, tell them why this issue is important to you. Ask them to keep the needs of farmers, ranchers and rural communities in mind for future votes. Offer to help them understand what is important to you.

MFU stood in support of HB 276. Our policy statement on food security begins by stating that access to affordable, quality food is a basic human right. No person should go hungry or experience food insecurity. Full and equitable access to safe, affordable, nutritious food and clean water is essential to both rural and urban communities. It is a priority of the members of MFU to promote resilient regional food systems and diverse markets in order to achieve these goals.

This program would have provided funding to local food pantries to purchase and distribute fresh, local products. It would build both resilient regional food systems and it diversify the market. So its a two-fer! Montana farmers and ranchers need to get their products to market, and when that market is close to home, its easier, more efficient and more resilient.

The pandemic showed us all how reliant we are on big, corporate-driven markets, and how they failed us in an emergency. The Farm to Food Bank program could have helped to build a new, local, more reliable market for our goods, direct local money into rural communities and enable regular Montanans to get fresh, locally grown food.

Unfortunately, after the bill was passed in the House and Senate Agriculture committees, the House Appropriations committee, and the House and Senate Floors, it was finally killed on a 12-7 vote in Senate Finance and Claims. The bill asked for \$1million over two years, considerably less than the \$X million that has been put aside for defending unconstitutional bills in court. Sens. Mike Lang (R-Malta) and Carl Glimm (R-Kila) spoke out against the bill because of the cost, saying that farmers would give food to people in need if they just asked. Sen Forrest Mandeville (R- Columbus) also spoke out against the bill, say he wasn't "a big fan of the concept". Other legislators, such as Rep Greg Kmetz (R - Miles City) and Sen Dan Bartel (R- Lewistown) were unable to make up their minds, both initially voting for the bill, then switching sides on a later vote.

HB 276 Establish a farm to food bank grant program- Rep Marty Malone

Rotunda Roundup

PRESENTED BY MONTANA FARMERS UNION

Farm to Food Bank HB 276

What you can do:

Reach out to your legislator, or any of the legislators on the back of this card. These are the legislators from one region on the map.

Tell the legislator your name, where you live, and why agriculture is important to you.

If their votes are green, say THANK YOU! Tell them why you support their vote.

If their votes are red, tell them why this issue is important to you. Ask them to keep the needs of farmers, ranchers and rural communities in mind for future votes. Offer to help them understand what is important to you.

MFU stood in support of HB 276. Our policy statement on food security begins by stating that access to affordable, quality food is a basic human right. No person should go hungry or experience food insecurity. Full and equitable access to safe, affordable, nutritious food and clean water is essential to both rural and urban communities. It is a priority of the members of MFU to promote resilient regional food systems and diverse markets in order to achieve these goals.

This program would have provided funding to local food pantries to purchase and distribute fresh, local products. It would build both resilient regional food systems and it diversify the market. So its a two-fer! Montana farmers and ranchers need to get their products to market, and when that market is close to home, its easier, more efficient and more resilient.

The pandemic showed us all how reliant we are on big, corporate-driven markets, and how they failed us in an emergency. The Farm to Food Bank program could have helped to build a new, local, more reliable market for our goods, direct local money into rural communities and enable regular Montanans to get fresh, locally grown food.

Unfortunately, after the bill was passed in the House and Senate Agriculture committees, the House Appropriations committee, and the House and Senate Floors, it was finally killed on a 12-7 vote in Senate Finance and Claims. The bill asked for \$1million over two years, considerably less than the \$X million that has been put aside for defending unconstitutional bills in court. Sens. Mike Lang (R-Malta) and Carl Glimm (R-Kila) spoke out against the bill because of the cost, saying that farmers would give food to people in need if they just asked. Sen Forrest Mandeville (R- Columbus) also spoke out against the bill, say he wasn't "a big fan of the concept". Other legislators, such as Rep Greg Kmetz (R - Miles City) and Sen Dan Bartel (R- Lewistown) were unable to make up their minds, both initially voting for the bill, then switching sides on a later vote.

HB 276 Establish a farm to food bank grant program- Rep Marty Malone

KEY TO READING THIS TABLE:

Bills have votes in committees, and on the House and Senate Floors.

Green means the legislator's vote agreed with MFU's position.

Red means the legislator's vote did not agree with MFU's position.

The darker the color, the more times they voted for or against our position.

Sometimes a bill can change during its journey through the legislature, and that may be why the legislator changed their vote. Ask them!

Tell the legislator your name, where you live, and why agriculture is important to you.

If their votes are green, say THANK YOU! Tell them why you support their vote.

If their votes are red, tell them why this issue is important to you. Ask them to keep the needs of farmers, ranchers and rural communities in mind for future votes. Offer to help them understand what is important to you.

Rural Montana has an enormous problem with getting appropriate, skilled nursing support for our senior friends, neighbors and family members who want to continue to live near where they spent their lives. Medicaid reimbursement rates that don't cover the cost of care have resulted in the closure of 11 nursing homes and loss of 857 skilled nursing facility beds in the state.

The members of MFU have written policy to "incentivize providers to practice in rural areas, improving access to and quality of care ." The best way to incentivize providers is to compensate them fairly for their work.

Rural Montana hospitals and care facilities rely heavily on Medicaid and Medicare payments, and nearly half of Montanans covered by Medicaid are from small towns, where many businesses can't afford to pay for health insurance for their employees.

If the Governor had not vetoed this bill, sponsored by Sen Becky Beard (R-Elliston), it would have provided that rates for nursing homes be increased annually in line with inflation up to 3% starting in 2025. It would also require an analysis every four years to determine if a new base level for the Medicaid reimbursement rates is needed. The bill had broad bipartisan support in the House and Senate committees and floor votes. It was heavily amended, but its final version still would have saved the state money by allowing for more federal matching funds. An analysis by Gianforte's own budget office said the bill would have saved the state \$1 million during its first two years by using more federal money. Nevertheless, stating that implementing the changes would be "too cumbersome" and objected to the fact that seniors who qualify for Medicaid are "entitled" to being included in the Community First Choice program, the Governor vetoed SB 296.

Sen Beard told the Montana Free Press that "while she shares the concerns of her fellow conservatives about the state budget, paying for more assisted living slots is both fiscally sound and the right thing to do, and that she'll pursue it again in the 2025 legislature."

SB 296 - Revise nursing home and/or assisted living funding- Sen Becky Beard

Nursing Home Funding SB 296

Rotunda Roundup

PRESENTED BY MONTANA FARMERS UNION

What you can do:

Reach out to your legislator, or any of the legislators on the back of this card. These are the legislators from one region on the map.

Tell the legislator your name, where you live, and why agriculture is important to you.

If their votes are green, say THANK YOU! Tell them why you support their vote.

If their votes are red, tell them why this issue is important to you. Ask them to keep the needs of farmers, ranchers and rural communities in mind for future votes. Offer to help them understand what is important to you.

Rural Montana has an enormous problem with getting appropriate, skilled nursing support for our senior friends, neighbors and family members who want to continue to live near where they spent their lives. Medicaid reimbursement rates that don't cover the cost of care have resulted in the closure of 11 nursing homes and loss of 857 skilled nursing facility beds in the state.

The members of MFU have written policy to "incentivize providers to practice in rural areas, improving access to and quality of care." The best way to incentivize providers is to compensate them fairly for their work.

Rural Montana hospitals and care facilities rely heavily on Medicaid and Medicare payments, and nearly half of Montanans covered by Medicaid are from small towns, where many businesses can't afford to pay for health insurance for their employees.

If the Governor had not vetoed this bill, sponsored by Sen Becky Beard (R-Elliston), it would have provided that rates for nursing homes be increased annually in line with inflation up to 3% starting in 2025. It would also require an analysis every four years to determine if a new base level for the Medicaid reimbursement rates is needed. The bill had broad bipartisan support in the House and Senate committees and floor votes. It was heavily amended, but its final version still would have saved the state money by allowing for more federal matching funds. An analysis by Gianforte's own budget office said the bill would have saved the state \$1 million during its first two years by using more federal money. Nevertheless, stating that implementing the changes would be "too cumbersome" and objected to the fact that seniors who qualify for Medicaid are "entitled" to being included in the Community First Choice program, the Governor vetoed SB 296.

Sen Beard told the Montana Free Press that "while she shares the concerns of her fellow conservatives about the state budget, paying for more assisted living slots is both fiscally sound and the right thing to do, and that she'll pursue it again in the 2025 legislature."

SB 296 - Revise nursing home and/or assisted living funding- Sen Becky Beard

KEY TO READING THIS TABLE:

Bills have votes in committees, and on the House and Senate Floors.

Green means the legislator's vote agreed with MFU's position.

Red means the legislator's vote did not agree with MFU's position.

The darker the color, the more times they voted for or against our position.

Sometimes a bill can change during its journey through the legislature, and that may be why the legislator changed their vote. Ask them!

Right to Repair

SB 347 and HB 475

Rotunda Roundup

PRESENTED BY MONTANA FARMERS UNION

What you can do:

Reach out to your legislator, or any of the legislators on the back of this card. These are the legislators from one region on the map.

Tell the legislator your name, where you live, and why agriculture is important to you.

If their votes are green, say THANK YOU! Tell them why you support their vote.

If their votes are red, tell them why this issue is important to you. Ask them to keep the needs of farmers, ranchers and rural communities in mind for future votes. Offer to help them understand what is important to you.

Montana farmers and ranchers don't have access to the software and tools to repair their own tractors. When a tractor breaks down, it isn't a matter of unscrewing one part and screwing on another one. Nowadays to fix the problem, you need special equipment to program new parts to communicate with the onboard computers.

Manufacturers claim to sell the tools needed to repair our equipment, but it has been proven to be a lie. Farmers union believes that this is a deceptive trade practice, and they should be held accountable. By refusing to provide these tools it keeps their monopoly on the parts and repair market. That monopoly excludes service competition, boosts service prices and unlawfully forces farmers to use only their technicians. Farmers and ranchers have always relied on local dealerships for help, but manufacturers have pushed many dealerships to consolidate and exclusively sell and service one brand of equipment. That means less choice for Montana farmers. During the busy season they might have to wait for days or weeks for a certified technician to show up while their crops rot and their tractor is idle.

These two bills, sponsored by Sen Willis Curdy (D-Missoula) Rep Tom France (D-Bozeman) were about fair access to software tools and updates that enable farmers and independent mechanics to diagnose and repair equipment. Both bills were tabled in the Senate and House Ag committees on party line votes, with the notable exception of Rep James Bergstrom (R-Butte), the only Republican to vote for farmers and ranchers. We are grateful to him as well as Senators Susan Webber (D-Browning), Ellie Boldman (D-Missoula) Shane Morigeau (D-Missoula) and Shannon O'Brien (D-Missoula) and to Representatives Dave Fern Dave Fern (D-Whitefish), Bob Carter (D-Missoula), Melissa Romano (D-Helena), Frank Smith (D-Poplar), Katie Sullivan (D-Missoula) and Marvin Weatherwax (D-Browning) for their support!

Right to Repair

SB 347 and HB 475

Rotunda Roundup

PRESENTED BY MONTANA FARMERS UNION

What you can do:

Reach out to your legislator, or any of the legislators on the back of this card. These are the legislators from one region on the map.

Tell the legislator your name, where you live, and why agriculture is important to you.

If their votes are green, say THANK YOU! Tell them why you support their vote.

If their votes are red, tell them why this issue is important to you. Ask them to keep the needs of farmers, ranchers and rural communities in mind for future votes. Offer to help them understand what is important to you.

Montana farmers and ranchers don't have access to the software and tools to repair their own tractors. When a tractor breaks down, it isn't a matter of unscrewing one part and screwing on another one. Nowadays to fix the problem, you need special equipment to program new parts to communicate with the onboard computers.

Manufacturers claim to sell the tools needed to repair our equipment, but it has been proven to be a lie. Farmers union believes that this is a deceptive trade practice, and they should be held accountable. By refusing to provide these tools it keeps their monopoly on the parts and repair market. That monopoly excludes service competition, boosts service prices and unlawfully forces farmers to use only their technicians. Farmers and ranchers have always relied on local dealerships for help, but manufacturers have pushed many dealerships to consolidate and exclusively sell and service one brand of equipment. That means less choice for Montana farmers. During the busy season they might have to wait for days or weeks for a certified technician to show up while their crops rot and their tractor is idle.

These two bills, sponsored by Sen Willis Curdy (D- Missoula) Rep Tom France (D-Bozeman) were about fair access to software tools and updates that enable farmers and independent mechanics to diagnose and repair equipment. Both bills were tabled in the Senate and House Ag committees on party line votes, with the notable exception of Rep James Bergstrom (R-Buffalo), the only Republican to vote for farmers and ranchers. We are grateful to him as well as Senators Susan Webber (D-Browning), Ellie Boldman (D- Missoula) Shane Morigeau (D- Missoula) and Shannon O'Brien (D- Missoula) and to Representatives Dave Fern Dave Fern (D-Whitefish), Bob Carter (D-Missoula), Melissa Romano (D-Helena), Frank Smith (D-Poplar), Katie Sullivan (D-Missoula) and Marvin Weatherwax (D-Browning) for their support!

SB 347- Right to Repair - Sen Willis Curdy

HB 475- Right to Repair - Rep Tom France

KEY TO READING THIS TABLE:

Bills have votes in committees, and on the House and Senate Floors.

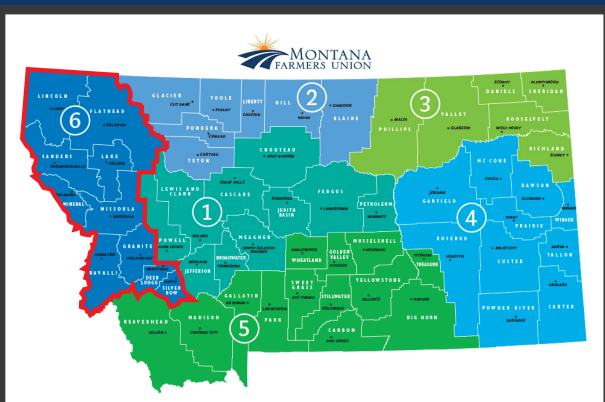

Green means the legislator's vote agreed with MFU's position.

Red means the legislator's vote did not agree with MFU's position.

The darker the color, the more times they voted for or against our position.

Sometimes a bill can change during its journey through the legislature, and that may be why the legislator changed their vote. Ask them!

Country of Origin Labeling HB 350

Rotunda Roundup

PRESENTED BY MONTANA FARMERS UNION

What you can do:

Reach out to your legislator, or any of the legislators on the back of this card. These are the legislators from one region on the map.

Tell the legislator your name, where you live, and why agriculture is important to you.

If their votes are green, say THANK YOU! Tell them why you support their vote.

If their votes are red, tell them why this issue is important to you. Ask them to keep the needs of farmers, ranchers and rural communities in mind for future votes. Offer to help them understand what is important to you.

Consumers have the right to know the origin of their beef purchases, and ranchers have the right to a fair and competitive market. This is a reasonable expectation. However, since 2015 Congress specifically exempted beef and pork from labeling laws. Consumers do not know where their beef comes from, and ranchers do not get fair prices for their products.

Many consumers may be fine buying imported beef, and that should be their right. However, what is not right is buying Brazilian beef while being led to believe it was born, raised and processed in the USA. You might think it would be a no-brainer to pass a MT COOL bill in the Legislature of Montana, where cattle is the most important industry, but it is not. Its hard to explain why individual legislators don't want consumers to know the origin of their beef, but this is in fact what happened.

The House Agriculture committee considered HB 350, for Country of Origin Labeling, sponsored by Rep Frank Smith (D- Poplar). A bill similar to this bill was sponsored by Senator Tester and passed in 2005. When Tester was elected to the US Senate he was able to use this bill to help encourage the USDA to implement COOL at the Federal level. The process of executive action begins with discussion about the bill by the committee members. Rep Katie Sullivan opened the discussion by strongly supporting passing the bill. She mentioned how important it is to family farmers and ranchers to have truth in labeling. Rep Casey Knudsen then spoke against the bill. The committee then voted to table the bill. The following members voted FOR COOL, and we thank them heartily!

Rep Dave Fern (D- Whitefish), Rep Marvin Weatherwax (D- Browning), Rep Bob Carter (D- Missoula) ,Rep Katie Sullivan (D-Missoula), Rep Paul Green (R-Hardin), Rep James Bergstrom (R- Buffalo) and Sponsor, Rep Frank Smith (D-Poplar).

Country of Origin Labeling HB 350

Rotunda Roundup

PRESENTED BY MONTANA FARMERS UNION

What you can do:

Reach out to your legislator, or any of the legislators on the back of this card. These are the legislators from one region on the map.

Tell the legislator your name, where you live, and why agriculture is important to you.

If their votes are green, say THANK YOU! Tell them why you support their vote.

If their votes are red, tell them why this issue is important to you. Ask them to keep the needs of farmers, ranchers and rural communities in mind for future votes. Offer to help them understand what is important to you.

Consumers have the right to know the origin of their beef purchases, and ranchers have the right to a fair and competitive market. This is a reasonable expectation. However, since 2015 Congress specifically exempted beef and pork from labeling laws. Consumers do not know where their beef comes from, and ranchers do not get fair prices for their products.

Many consumers may be fine buying imported beef, and that should be their right. However, what is not right is buying Brazilian beef while being led to believe it was born, raised and processed in the USA. You might think it would be a no-brainer to pass a MT COOL bill in the Legislature of Montana, where cattle is the most important industry, but it is not. Its hard to explain why individual legislators don't want consumers to know the origin of their beef, but this is in fact what happened.

The House Agriculture committee considered HB 350, for Country of Origin Labeling, sponsored by Rep Frank Smith (D- Poplar). A bill similar to this bill was sponsored by Senator Tester and passed in 2005. When Tester was elected to the US Senate he was able to use this bill to help encourage the USDA to implement COOL at the Federal level. The process of executive action begins with discussion about the bill by the committee members. Rep Katie Sullivan opened the discussion by strongly supporting passing the bill. She mentioned how important it is to family farmers and ranchers to have truth in labeling. Rep Casey Knudsen then spoke against the bill. The committee then voted to table the bill. The following members voted FOR COOL, and we thank them heartily!

Rep Dave Fern (D- Whitefish), Rep Marvin Weatherwax (D- Browning), Rep Bob Carter (D- Missoula) ,Rep Katie Sullivan (D-Missoula), Rep Paul Green (R-Hardin), Rep James Bergstrom (R- Buffalo) and Sponsor, Rep Frank Smith (D-Poplar).

HB 350- Country of Origin Labeling - Rep Frank Smith

KEY TO READING THIS TABLE:

Bills have votes in committees, and on the House and Senate Floors.

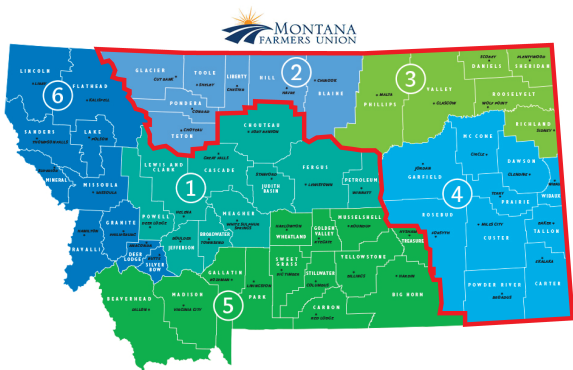

Green means the legislator's vote agreed with MFU's position.

Red means the legislator's vote did not agree with MFU's position.

The darker the color, the more times they voted for or against our position.

Sometimes a bill can change during its journey through the legislature, and that may be why the legislator changed their vote. Ask them!

Community Solar

SB 399 and

HB 524

Rotunda Roundup

REGISTERED MONTANA FARMERS UNION

What you can do:

Reach out to your legislator, or any of the legislators on the back of this card. These are the legislators from one region on the map.

Tell the legislator your name, where you live, and why agriculture is important to you.

If their votes are green, say **THANK YOU!** Tell them why you support their vote.

If their votes are red, tell them why this issue is important to you. Ask them to keep the needs of farmers, ranchers and rural communities in mind for future votes. Offer to help them understand what is important to you.

SB 399, sponsored by Sen Chris Pope, (D - Bozeman) would allow everyone – businesses, homeowners, and renters – to enjoy the benefits of solar technology. Community solar is a way for people to purchase solar energy without having to install solar panels on their home or business. This bill would have established a framework for developers to build community solar projects. Despite strong support from developers, climate groups and Montana residents, the bill was tabled in Senate Energy and Telecommunications committee, with all Republicans voting against it, and Democrats voting for it.

Everyone deserves the freedom to choose low-cost energy, and enabling community solar gives Montanans that freedom. It would support our rural communities, and provide more options for Montanans to utilize community solar. MFU members have identified that partnering with rural communities and utilities to increase use of renewable energy is important.

Montana Farmers Union supports programs to reduce our dependence on petroleum-based energy through the development of alternative sources such as biofuels, geothermal, solar and wind energy technologies - among others - to provide affordable energy. We have policy stating the goal to obtain 25% of energy from renewable sources by 2025.

HB 524, sponsored by Rep Josh Kassmier (R -Ft Benton) worked against these aims by requiring solar installers to provide customers with needless, very specific information about the manufacturing origins of solar panels. Requiring solar installers to provide detailed manufacturing information that they might not even have access to, and requiring a calculation of a carbon footprint is simply a lot of red tape. HB 524 would undermine Montanans' freedom to generate their own clean, affordable energy. The bill passed in the House, but was killed in the Senate, on a 25-25 vote.

As consumers we aren't given information about the manufacturing carbon footprint of any other type of energy source. If we were, we might choose more solar. Montana's family farmers and ranchers are simply trying to make a living, and to pass their heritage down to their children who want to stay on the land.

Community Solar

SB 399 and

HB 524

Rotunda Roundup

PRESENTED BY MONTANA FARMERS UNION

What you can do:

Reach out to your legislator, or any of the legislators on the back of this card. These are the legislators from one region on the map.

Tell the legislator your name, where you live, and why agriculture is important to you.

If their votes are green, say **THANK YOU!** Tell them why you support their vote.

If their votes are red, tell them why this issue is important to you. Ask them to keep the needs of farmers, ranchers and rural communities in mind for future votes. Offer to help them understand what is important to you.

SB 399, sponsored by Sen Chris Pope, (D - Bozeman) would allow everyone – businesses, homeowners, and renters – to enjoy the benefits of solar technology. Community solar is a way for people to purchase solar energy without having to install solar panels on their home or business. This bill would have established a framework for developers to build community solar projects. Despite strong support from developers, climate groups and Montana residents, the bill was tabled in Senate Energy and Telecommunications committee, with all Republicans voting against it, and Democrats voting for it.

Everyone deserves the freedom to choose low-cost energy, and enabling community solar gives Montanans that freedom. It would support our rural communities, and provide more options for Montanans to utilize community solar. MFU members have identified that partnering with rural communities and utilities to increase use of renewable energy is important.

Montana Farmers Union supports programs to reduce our dependence on petroleum-based energy through the development of alternative sources such as biofuels, geothermal, solar and wind energy technologies - among others - to provide affordable energy. We have policy stating the goal to obtain 25% of energy from renewable sources by 2025.

HB 524, sponsored by Rep Josh Kassmier (R -Ft Benton) worked against these aims by requiring solar installers to provide customers with needless, very specific information about the manufacturing origins of solar panels. Requiring solar installers to provide detailed manufacturing information that they might not even have access to, and requiring a calculation of a carbon footprint is simply a lot of red tape. HB 524 would undermine Montanans' freedom to generate their own clean, affordable energy. The bill passed in the House, but was killed in the Senate, on a 25-25 vote.

As consumers we aren't given information about the manufacturing carbon footprint of any other type of energy source. If we were, we might choose more solar. Montana's family farmers and ranchers are simply trying to make a living, and to pass their heritage down to their children who want to stay on the land.

SB 399 - Revising Community Solar Laws - Sen Chris Pope

HB 524 - Revise Energy Laws related to solar panels - Rep Josh Kassmier

KEY TO READING THIS TABLE:

Bills have votes in committees, and on the House and Senate Floors.

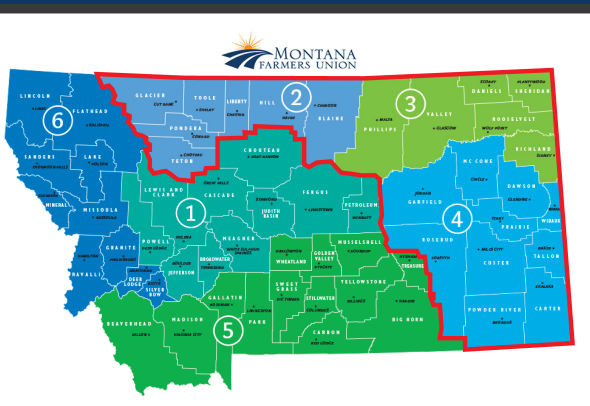

Green means the legislator's vote agreed with MFU's position.

Red means the legislator's vote did not agree with MFU's position.

The darker the color, the more times they voted for or against our position.

Sometimes a bill can change during its journey through the legislature, and that may be why the legislator changed their vote. Ask them!

**Votes on SB 399 and HB 524-
Community solar**

Agritourism

SB 447

What you can do:

Reach out to your legislator, or any of the legislators on the back of this card. These are the legislators from one region on the map.

Tell the legislator your name, where you live, and why agriculture is important to you.

If their votes are green, say **THANK YOU!** Tell them why you support their vote.

If their votes are red, tell them why this issue is important to you. Ask them to keep the needs of farmers, ranchers and rural communities in mind for future votes. Offer to help them understand what is important to you.

MFU supports the expansion of agritourism opportunities. Family Farmers and Ranchers are facing unprecedented challenges to our way of life. Trying to compete with the economics of corporate scale means that our members have to be more and more creative in finding ways to augment low prices, and to defray ever-increasing costs.

SB 447, sponsored by Butch Gillespie (R- Ethridge) would have broadened the definition of agritourism to include U-Pick operations, and clarifying the definition of inherent risk, to protect farmers and ranchers from being sued by tourists unnecessarily. The bill passed in the Senate, but failed in the House Agriculture Committee unanimously, as concerns were raised about the balance of rights between businesses and consumers.

SB 447 - Revising Agritourism Laws - Sen Butch Gillespie

KEY TO READING THIS TABLE:

Bills have votes in committees, and on the House and Senate Floors.

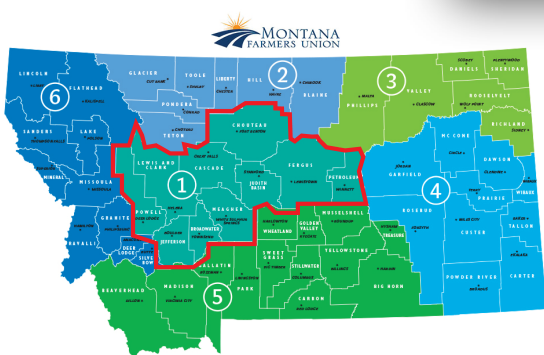

Green means the legislator's vote agreed with MFU's position.

Red means the legislator's vote did not agree with MFU's position.

The darker the color, the more times they voted for or against our position.

Sometimes a bill can change during its journey through the legislature, and that may be why the legislator changed their vote. Ask them!

Reach out to your legislator, or any of the legislators on the back of this card. These are the legislators from one region on the map.

Tell the legislator your name, where you live, and why agriculture is important to you.

If their votes are green, say **THANK YOU!** Tell them why you support their vote.

If their votes are red, tell them why this issue is important to you. Ask them to keep the needs of farmers, ranchers and rural communities in mind for future votes. Offer to help them understand what is important to you.

MFU supports the expansion of agritourism opportunities. Family Farmers and Ranchers are facing unprecedented challenges to our way of life. Trying to compete with the economics of corporate scale means that our members have to be more and more creative in finding ways to augment low prices, and to defray ever-increasing costs.

SB 447, sponsored by Butch Gillespie (R- Ethridge) would have broadened the definition of agritourism to include U-Pick operations, and clarifying the definition of inherent risk, to protect farmers and ranchers from being sued by tourists unnecessarily. The bill passed in the Senate, but failed in the House Agriculture Committee unanimously, as concerns were raised about the balance of rights between businesses and consumers.

SB 447 - Revising Agritourism Laws - Sen Butch Gillespie

KEY TO READING THIS TABLE:

Bills have votes in committees, and on the House and Senate Floors.

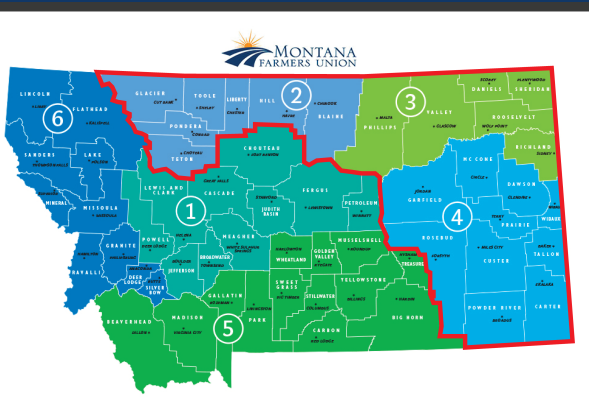

Green means the legislator's vote agreed with MFU's position.

Red means the legislator's vote did not agree with MFU's position.

The darker the color, the more times they voted for or against our position.

Sometimes a bill can change during its journey through the legislature, and that may be why the legislator changed their vote. Ask them!

Rotunda Roundup

PRESENTED BY MONTANA FARMERS UNION

What you can do:

Reach out to your legislator, or any of the legislators on the back of this card. These are the legislators from one region on the map.

Tell the legislator your name, where you live, and why agriculture is important to you.

If their votes are green, say THANK YOU! Tell them why you support their vote.

If their votes are red, tell them why this issue is important to you. Ask them to keep the needs of farmers, ranchers and rural communities in mind for future votes. Offer to help them understand what is important to you.

A Refinery in Great Falls has converted half of its capacity to renewable diesel. It will require 2 million acres of oil seed for feedstock. Canola will be a good rotational crop for Mt farmers. About 185 thousand acres of spring canola is currently grown here, and MSU is doing some research into winter canola, which has a higher yield and can lead to a more lucrative harvest for farmers. Most varieties of winter canola are suited to farms in Kansas and points south, but with a little work on winter varieties and an easily accessible market, Montana farmers will have a new tool in their tool box to survive economically.

In addition to being great for farmers, The EPA concluded that the life-cycle greenhouse gas emissions from biodiesel made with canola oil are half of the petroleum-based diesel fuel. Montana Farmers Union has strongly advocated increasing biofuels and getting canola as an approved feedstock for renewable diesel.

Montana refineries and producers should be encouraged to utilize and expand the market using Montana-grown canola instead of shipping in soybean oil from out of state. Montana refineries and producers should be encouraged to utilize and expand the market for biofuels using Montana-grown canola instead of shipping in soybean oil from out of state. Growing our fuel helps us to be less dependent on foreign oil and increases our national security.

SB 510, sponsored by Sen Steve Fitzpatrick (R- Great Falls) passed with broad bipartisan support in both the Senate and the House.

SB 508 and SB 541, sponsored by Sen Mary Ann Dunwell (D- East Helena), encouraged everyone to use more biofuels by creating a biofuel usage tax credit, and a Montana-made biofuel tax credit, and making Cooperative Associations eligible for the credit. Agricultural coops are innovators in biofuels, and are uniquely positioned to expand both biofuel use and production.

SB 510, SB 541 and SB 508 together would have created a policy framework for a complete market - from growing canola, to processing it into fuel, and selling it, all in Montana. Unfortunately SB 508 and SB 541 were both killed in Senate Taxation committee, on party-line votes with all Democrats voting for the bills and all Republicans voting against them.

SB 510 - Provide property tax incentives for alternative fuel production - Sen Steve Fitzpatrick
SB 541 - Establish tax credit for biofuels made and sold in Montana - Sen MaryAnn Dunwell
SB 508 - Encourage consumer use of biofuels- Sen MaryAnn Dunwell

PRESENTED BY MONTANA FARMERS UNION

What you can do:

Reach out to your legislator, or any of the legislators on the back of this card. These are the legislators from one region on the map.

Tell the legislator your name, where you live, and why agriculture is important to you.

If their votes are green, say THANK YOU! Tell them why you support their vote.

If their votes are red, tell them why this issue is important to you. Ask them to keep the needs of farmers, ranchers and rural communities in mind for future votes. Offer to help them understand what is important to you.

A Refinery in Great Falls has converted half of its capacity to renewable diesel. It will require 2 million acres of oil seed for feedstock. Canola will be a good rotational crop for Mt farmers. About 185 thousand acres of spring canola is currently grown here, and MSU is doing some research into winter canola, which has a higher yield and can lead to a more lucrative harvest for farmers. Most varieties of winter canola are suited to farms in Kansas and points south, but with a little work on winter varieties and an easily accessible market, Montana farmers will have a new tool in their tool box to survive economically.

In addition to being great for farmers, The EPA concluded that the life-cycle greenhouse gas emissions from biodiesel made with canola oil are half of the petroleum-based diesel fuel. Montana Farmers Union has strongly advocated increasing biofuels and getting canola as an approved feedstock for renewable diesel.

Montana refineries and producers should be encouraged to utilize and expand the market using Montana-grown canola instead of shipping in soybean oil from out of state. Montana refineries and producers should be encouraged to utilize and expand the market for biofuels using Montana-grown canola instead of shipping in soybean oil from out of state. Growing our fuel helps us to be less dependent on foreign oil and increases our national security.

SB 510, sponsored by Sen Steve Fitzpatrick (R- Great Falls) passed with broad bipartisan support in both the Senate and the House.

SB 508 and SB 541, sponsored by Sen Mary Ann Dunwell (D- East Helena), encouraged everyone to use more biofuels by creating a biofuel usage tax credit, and a Montana-made biofuel tax credit, and making Cooperative Associations eligible for the credit. Agricultural coops are innovators in biofuels, and are uniquely positioned to expand both biofuel use and production.

SB 510, SB 541 and SB 508 together would have created a policy framework for a complete market - from growing canola, to processing it into fuel, and selling it, all in Montana. Unfortunately SB 508 and SB 541 were both killed in Senate Taxation committee, on party-line votes with all Democrats voting for the bills and all Republicans voting against them.

SB 510 - Provide property tax incentives for alternative fuel production - Sen Steve Fitzpatrick

SB 541 - Establish tax credit for biofuels made and sold in Montana - Sen MaryAnn Dunwell

SB 508 - Encourage consumer use of biofuels- Sen MaryAnn Dunwell

KEY TO READING THIS TABLE:

Bills have votes in committees, and on the House and Senate Floors.

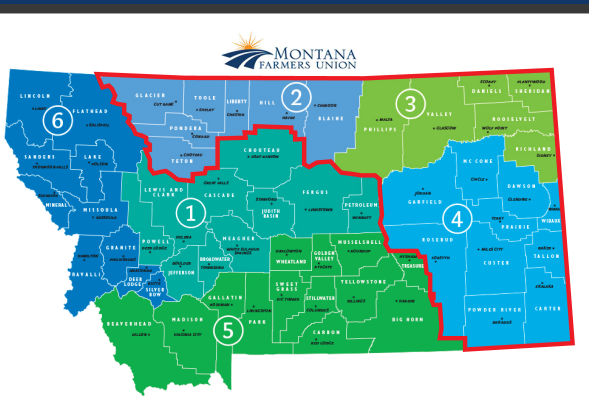

Green means the legislator's vote agreed with MFU's position.

Red means the legislator's vote did not agree with MFU's position.

The darker the color, the more times they voted for or against our position.

Sometimes a bill can change during its journey through the legislature, and that may be why the legislator changed their vote. Ask them!

**Votes on SB 510, 508 and 541-
Biofuels tax credits**

Shelf space for Montana Food SB 537

What you can do:

Reach out to your legislator, or any of the legislators on the back of this card. These are the legislators from one region on the map.

Tell the legislator your name, where you live, and why agriculture is important to you.

If their votes are green, say THANK YOU! Tell them why you support their vote.

If their votes are red, tell them why this issue is important to you. Ask them to keep the needs of farmers, ranchers and rural communities in mind for future votes. Offer to help them understand what is important to you.

This Montana Food Promotion bill would have provided an incentive for retailers to provide shelf space to Montana Producers. It would allow retailers to deduct the cost of Montana made foods at the time of purchase instead of at the time of sale - which means they can afford to keep Montana products on the shelves which is why we also call it the Shelf Space Bill. The bill allows retailers to deduct the sales of Montana foods from their tax liability.

SB 537, carried by Sen Jason Small (R-Busby) had a great hearing in Senate Business and Labor, raising awareness of the issue, on the record. It was tabled in committee, because legislators found the idea intriguing, but felt they needed more information before enacting it into law.

**SB 537 - Provide tax incentives for sale of Montana produced food-
Sen Jason Small**

KEY TO READING THIS TABLE:

Charter Schools

HB 549 and

HB 562

What you can do:

Reach out to your legislator, or any of the legislators on the back of this card. These are the legislators from one region on the map.

Tell the legislator your name, where you live, and why agriculture is important to you.

If their votes are green, say THANK YOU! Tell them why you support their vote.

If their votes are red, tell them why this issue is important to you. Ask them to keep the needs of farmers, ranchers and rural communities in mind for future votes. Offer to help them understand what is important to you.

Establishing a charter school system will have a negative impact on funding for rural public schools. Charter schools or “community choice” schools do not serve urban and rural students equally, and have been shown to underserve students with disabilities and special needs. Both of these bills will undermine and underfund our public schools. Certainly some private schools are great schools.

In rural areas charter schools face some real challenges. Montana’s farm and ranch communities simply have too few K-12 students to sustain an additional school, and the additional schools can and do affect the enrollment of local school districts and their budgets

MFU has policy to instead work toward providing the funding that will go to charter schools, for public schools. Its the only way to guarantee educational opportunity for rural public schools.

Both HB 549, sponsored by Rep Fred Anderson (R- Great Falls) and HB 562, sponsored by Rep Sue Vinton (R- Billings) were signed into law, though there is confusion about if the two bills will conflict with each other. HB 549 was supported by the bulk of Montana’s public education organizations, while HB 562 was supported by charter school advocates and Republican legislators.

Both bills had a bumpy trip through the legislative process, passing through the House, and then being voted down in the Senate. On the urging of Governor Gianforte, both bills were resurrected and passed through the Senate, with 20 of the Senate’s 34 Republicans changing their votes. Each of these new laws could result in the creation of governing entities outside existing school boards, which could be in contravention to the Constitution’s requirement for elected school governance.

HB 549- Authorizing establishment of public charter schools - Rep Fred Anderson
HB 562 - Authorizing establishment of community choice schools - Rep Sue Vinton

KEY TO READING THIS TABLE:

Bills have votes in committees, and on the House and Senate Floors.

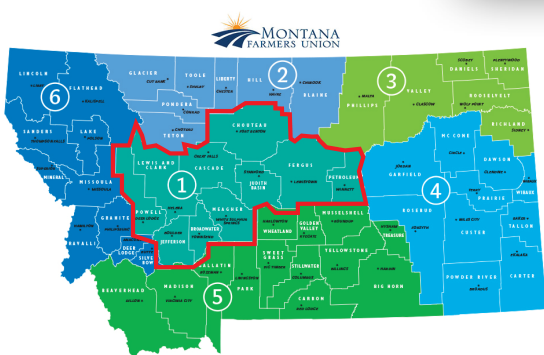

Green means the legislator's vote agreed with MFU's position.

Red means the legislator's vote did not agree with MFU's position.

The darker the color, the more times they voted for or against our position.

Sometimes a bill can change during its journey through the legislature, and that may be why the legislator changed their vote. Ask them!

Medicaid Provider Rates HB 649

What you can do:

Reach out to your legislator, or any of the legislators on the back of this card. These are the legislators from one region on the map.

Tell the legislator your name, where you live, and why agriculture is important to you.

If their votes are green, say THANK YOU! Tell them why you support their vote.

If their votes are red, tell them why this issue is important to you. Ask them to keep the needs of farmers, ranchers and rural communities in mind for future votes. Offer to help them understand what is important to you.

Rural Montana has an enormous problem with getting access to appropriate health care. Rural hospitals and care facilities rely heavily on Medicaid and Medicare payments, and nearly half of Montanans covered by Medicaid are from small towns, where many businesses can't afford to pay for health insurance for their employees.

The members of MFU have written policy to "incentivize providers to practice in rural areas, improving access to and quality of care." The best way to incentivize providers is to compensate them fairly for their work.

HB 649, sponsored by Rep Mary Caferro (D- Helena), would have increased Medicaid provider rates up to the rates recommended by an independent report commissioned by the 2021 Legislature. The 186 page report found that Montana's Medicaid provider rates are nearly 22% below the actual cost of care. The Governor's budget did not raise provider rates enough, so this bill aimed to make up for the shortfall.

The bill passed in the House, and then was significantly amended to reduce how much money would be allocated to bridge the difference in the House Appropriations Committee. It was then killed in the Senate Finance and claims committee, on a party-line vote: all Republicans voted against it, and all Democrats voted for it.

The \$12m per year in the final version of the bill would have been multiplied by a factor of at least 3 and in some cases 9, in Federal matching funds. Leveraging our money this way, to invest in our rural communities, is necessary to keep families on the land, carrying forward the traditional Montana farming and ranching way of life. Instead, the Legislature chose to pass a billion-dollar -plus spending and tax cut package that will reduce state tax collections by roughly \$150m per year on a permanent basis, which will further hamstring efforts to reimburse Medicaid providers adequately.

HB 649- Implement rates from provider rate study - Rep Mary Caferro

KEY TO READING THIS TABLE:

Bills have votes in committees, and on the House and Senate Floors.

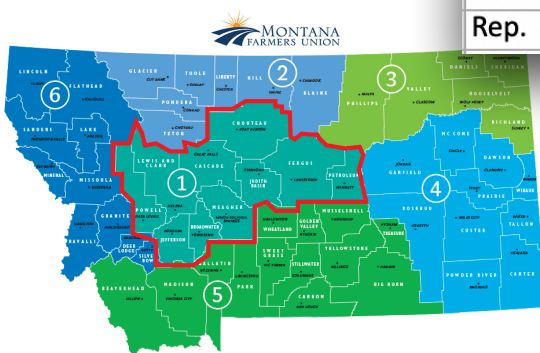

Green means the legislator's vote agreed with MFU's position.

Red means the legislator's vote did not agree with MFU's position.

The darker the color, the more times they voted for or against our position.

Sometimes a bill can change during its journey through the legislature, and that may be why the legislator changed their vote. Ask them!

Votes on HB 649- Medicaid provider rates

Charter Schools

HB 549 and

HB 562

Rotunda Roundup

PRESENTED BY MONTANA FARMERS UNION

What you can do:

Reach out to your legislator, or any of the legislators on the back of this card. These are the legislators from one region on the map.

Tell the legislator your name, where you live, and why agriculture is important to you.

If their votes are green, say THANK YOU! Tell them why you support their vote.

If their votes are red, tell them why this issue is important to you. Ask them to keep the needs of farmers, ranchers and rural communities in mind for future votes. Offer to help them understand what is important to you.

Establishing a charter school system will have a negative impact on funding for rural public schools. Charter schools or “community choice” schools do not serve urban and rural students equally, and have been shown to underserve students with disabilities and special needs. Both of these bills will undermine and underfund our public schools. Certainly some private schools are great schools.

In rural areas charter schools face some real challenges. Montana’s farm and ranch communities simply have too few K-12 students to sustain an additional school, and the additional schools can and do affect the enrollment of local school districts and their budgets

MFU has policy to instead work toward providing the funding that will go to charter schools, for public schools. Its the only way to guarantee educational opportunity for rural public schools.

Both HB 549, sponsored by Rep Fred Anderson (R- Great Falls) and HB 562, sponsored by Rep Sue Vinton (R- Billings) were signed into law, though there is confusion about if the two bills will conflict with each other. HB 549 was supported by the bulk of Montana’s public education organizations, while HB 562 was supported by charter school advocates and Republican legislators.

Both bills had a bumpy trip through the legislative process, passing through the House, and then being voted down in the Senate. On the urging of Governor Gianforte, both bills were resurrected and passed through the Senate, with 20 of the Senate’s 34 Republicans changing their votes. Each of these new laws could result in the creation of governing entities outside existing school boards, which could be in contravention to the Constitution’s requirement for elected school governance.

HB 549- Authorizing establishment of public charter schools - Rep Fred Anderson
HB 562 - Authorizing establishment of community choice schools - Rep Sue Vinton

Skilled Trades & Microbusiness

HB 944 and HB 898

What you can do:

Reach out to your legislator, or any of the legislators on the back of this card. These are the legislators from one region on the map.

Tell the legislator your name, where you live, and why agriculture is important to you.

If their votes are green, say **THANK YOU!** Tell them why you support their vote.

If their votes are red, tell them why this issue is important to you. Ask them to keep the needs of farmers, ranchers and rural communities in mind for future votes. Offer to help them understand what is important to you.

When it comes to discussing a budget, people say: "Don't tell me what your values are, show me your budget and I'll know what you value." The members of Montana Farmers Union have a written policy calling for adequate funding for vocational and technical education. We, along with most Montanans, value keeping our kids on the land, building functional communities for their kids to thrive in.

To do that we have to have qualified agricultural equipment operators, inspectors, farm and ranch workers and laborers. The elements of the pilot program outlined in HB 944, sponsored by Rep Paul Tuss (D - Havre) were based on research and the recommendations of a 2 Year Commission studying the issue. The bill provides one-time grants for school districts to develop a Montana in-demand skilled trades investment. Students the program would be encouraged to stay in Montana. This would help youth from agricultural families to find and participate in career and technical education, and stay on the land.

The Microbusiness Development Act established a program to assist in the creation, development and financing of businesses with fewer than 10 employees and gross receipts of less than \$1m. HB 898 sponsored by Rep Paul Tuss (D - Havre), would have changed the definition of Microbusiness to include somewhat larger businesses, and raised the maximum amount for their guaranteed loans.

These investments in the next generation would have supported rural communities. It would have been a smart way to use our budget surplus, because the value generated by keeping our kids in Montana, and keeping our rural communities functional will provide ample return on investment.

Both of the bills passed through the House and Senate, but were killed in Senate Finance and Claims committee. Republican Senators Esp (R- Big Timber) and Lang (R- Malta) joined the democrats in voting to approve HB 898. Republican Senator Esp (R- Big Timber) joined the Democrats in supporting HB 944 in Senate Finance and Claims

HB 944 - Establish the Mt in-demand skilled trades investment pilot program - Rep Paul Tuss
HB 898- Revise the Montana Microbusiness Development Act - Rep Paul Tuss

KEY TO READING THIS TABLE:

Bills have votes in committees, and on the House and Senate Floors.

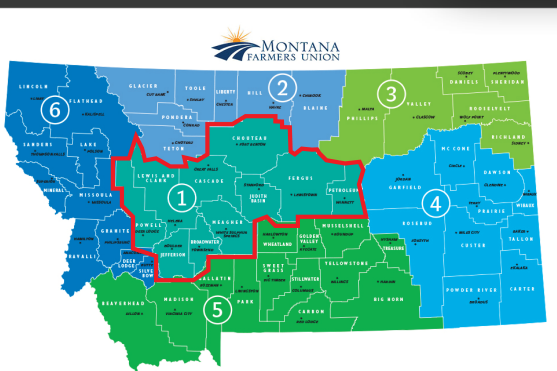

Green means the legislator's vote agreed with MFU's position.

Red means the legislator's vote did not agree with MFU's position.

The darker the color, the more times they voted for or against our position.

Sometimes a bill can change during its journey through the legislature, and that may be why the legislator changed their vote. Ask them!
